

Step 1: Lay your discoveries out in the middle of the table

Step 2: Warm up drawings!

Step 3: Select some coloured paper.

Step 4: Start to cut out shapes. Be bold with your scissors - no need to draw first.

Step 5: Build up your collage with more shapes and colours. Shapes can overlap.

Step 6: Carefully glue the pieces of your collage together.

Step 7: When your collage is dry, remember to write your name, class and school on the back in pencil. Don't stick your collage down onto any background paper - it's going to join other collages to become one big artwork!
